

Computing Intent

Children have the right to enjoy childhood online, to access safe online spaces, and to benefit from all the opportunities that a connected world can bring to them, appropriate to their age and stage. Through our computing curriculum at Whitchurch Primary School we aim to give our pupils confidence that will enable them to access new technology safely and responsibly with enthusiasm and maturity.

We hope to prepare pupils for the 21st century's modern working environment by equipping them with the skills and knowledge to feel confident in pursuing a career in Computing.

We endeavour to provide pupils with the opportunities to develop their computational thinking processes, allowing them to solve complex computing problems independently and across the Curriculum.

As part of the Computing curriculum, we provide opportunities for a diverse learning environment, promoting digital literacy, resilience and problem solving skills. As a result pupils will grow in confidence as their skill-set grows and their belief in themselves is Strengthened.

As they grow older, it is crucial that they learn to balance the benefits offered by technology with a critical awareness of their own and other's online behaviour and develop effective strategies for staying safe and making a positive contribution online
